Cisco OS Bug Scrub Engineer

Consultel IT & T Pty Ltd - [More jobs by this advertiser](#)

Cisco OS Bug Scrub Engineer

- **URGENT: 5 DAYS to review and report on Cisco Nexus/ other Cisco gear OS bug issues**
- **Work under guidance of network architect.**
- **Excellent contract rate for short term contract like this!**
- **Port Melbourne location.**

Short and sweet:

- **Requirement = immediate** for skilled engineer to scour/ review/ follow up and summarise the known bugs versus OS releases
- Data centre environment.
- New build in progress and pending testing.
- Cisco Nexus 6K & 7K switches, ASR 9K, etc + other Cisco gear in new build need close review.
- Need to identify IOS/NXOS software versions to be run in the new system(s).
- MPLS network in place. Implications of OS issues on build is key focus of this role.
- Different chassis = different functions, so it is not a generic solution or report that we need.
- CCDP/ CCNP/ CCIE candidates are most likely to make short list

Timeframe:

- Commences on Monday, 13 October
- 1/2 day briefing and whiteboard introduction
- 4 days to analyse architect's design documents and generate report on known fixes and workarounds
- 1/2 day to present findings

No tyre kickers please!! Excellent architect level rate for right candidate. Relevant prior experience (WAN/ core/ protocols/ fabric switching/ virtualised core)is needed to hit the access floor running.

7 Oct 2014

Location: Melbourne ▶ CBD & Inner Suburbs
